Subject: Terwilliger Fire Initial Burned Area Emergency Response Authorization

To: Forest Supervisor, Willamette National Forest

Enclosed is the approved initial emergency stabilization response authorization for the Terwilliger Fire based on your initial Burned Area Emergency Response (BAER) request dated October 17, 2018. You are authorized to spend up to \$56,300 for improved road and trail drainage and treatments, invasive plant early detection-rapid response treatments, and human life and safety treatments as shown below.

Land treatments – noxious and invasive plants	\$18,500
Road and trail treatments	\$19,700
Protection and safety treatments	\$18,100
Total	\$56,300

The fire was anticipated to be contained on October 31, 2018. For administrative purposes, the RO considers October 31, 2019 a sufficient benchmark from which to complete all authorized treatments. Funds are currently available for this project but could be restricted later if the need arises due to agency apportionment limitations. If this occurs, you will be contacted by the Regional Budget Officer regarding specific spending restrictions and procedures.

An emergency stabilization incident job code H6L3SB18 (0618) has been established for the implementation of this project. Your BAER assessment costs are separate from project costs and should be charged to the Region 6 BAER assessment job code H6BAER.

The Forest is responsible for providing financial oversight for this project. Any changes to this plan must be approved by the Regional Office. In addition, you will be required to provide an accomplishment report by February 28, 2020.

Please contact Cara Farr at 503-808-2937, cell phone 503-956-1026 or clfarr@fs.fed.us, if you have questions regarding this project.
